

Connector Box

Size(mm.)	Art.Nr.	MOQ
4x40mm	28-FPB 4x40mm	1

Features :

- 2 - way tube H closure in-line divisible
- The FPT in-line tube closure is a completely divisible direct buried closure which can be used for:
- Transition of tube to tube (same diameter)
- Transition of tube to different diameter tube
- Transition of microtube to microtube (one-on-one proportion)
- Transition of several microtubes to tube
- Transition of several minitubes to modular cable

The closure is excellently used for fibre network maintenance and fibre or tube blowing features.

The strain relief inlay parts are exchangeable, therefore it's possible to use one housing for several diameters and applications. A range of 25, 32, 40, 50 mm are available for use with the closure housing.

Tube connectors are easy to install due to the length of the closure. The closure can be installed without any special tools which makes it easier to handle.

Performance :

- Sealing level : up to IP54
- Crush resistance : up to 1000 N / 25 mm²
