

Cable Jacket Stripper

Size	Art.Nr.	MOQ
10 - 30mm	-	-

Overview :

- Across and Lengthwise Fiber Cable Stripper is used for stripping the sheath of optical cable.
- It uses unilateralism ratchet wheel to operate, so that the first-time stripped cable has the symmetry hatches on both sides, as we know, the Side Fiber Cable Ripper must strip twice in the Optical Cable Cut-over with Service process, this model overcomes this shortage.
- It is portable, compact, easy to operate, timesaving.
- The cut-in depth can be accommodated and the sheath can be stripped at any part of the fiber cable. It can do one-off strip for the fiber cable 10~ 30mm.
- It is an absolutely necessary tool for the quality guaranteeing and the safety in the fiber cable construction, especially in optical cable stripping for the Optical Cable Cut-over with Service.

Characteristics :

- New 70-degree blade, to make cable stripping more effort-saving.
- New type notch-wheel to strengthen the grip and avoid a skid while stripping the cable.
- Crosswise stripping function
