

FPT Terminal distribution box

FPT-DW-2.5 - is a splice closure for a multi residential units. It terminates 12 fibers in a compact design with innovative sealing concept and fiber management solution.

Easy wall mounting and access protection accessories are included in the set.

The bottom plate offers enough place to store excess lengths of fiber. A clip-mounting for a PLC splitter and a Crimp-Splice-Holder for 12 splices are enclosed to the set.

In the upper, mobile and removable fold-out-tray there can be placed up to 6 SC/E2000 or LC-Duplex-couplings. Therefore up to 12 fibers (LC) can be led out through connectors.

Model	FPT DW-2.5
Art. Number	27-010.546
