

FPT Terminal distribution box

FPT-DW-4 - is a splice closure for a larger number of residential units. It terminates 166 fibers in a compact design with innovative sealing concept and fiber management solution.

Easy wall mounting and access protection accessories are included in the set.

The bottom plate and the cassettes offer enough place to store excess lengths of fiber. Four clip mountings for PLC-Splitter and two 12x crimp-splice-holder are enclosed to the set.

The 2 x 6 splice cassettes can be removed and have space for up to 144 splices as well as unused fiber excess lengths.

Up to 2x 12 SC/E2000 or LC-duplex-couplings can be placed in the removable flap-holder. Therefore up to 48 patchcords (LC) can be connected.
